

Altia Kick Start Services

Do you have a grand vision for your next GUI? Do you need to get a boost on your GUI development project?

Altia can help. We are trusted partners for companies all over the world—getting high impact GUIs to market successfully. Our Kick Start Services Program offers a great way to take a test drive with Altia’s Engineering Services Team and speed your time to market.

We offer quick-turn engagements to help you get your GUI to the finish line quickly.

[Get in touch](#) to learn more about how Altia’s Kick Start Services can help your team.

We’ve delivered numerous projects in areas including:

Graphic Design

Our team can create custom 2D and 3D graphics and storyboards for branded look and feel and optimized UX.

Get GUI on Hardware

Graphics running too slowly? Let our team optimize your graphics for your MCU or MPU.

Prototypes and Demos

Need a prototype on PC or hardware for conferences, product marketing or executive reviews? We can do that.

Safety Services

Need help with industry-specific safety compliance (i.e. ISO 26262, ASIL, MISRA and others)? We do that, too.

Planning & Productization

Let us put together and implement a streamlined plan for architecting, developing and optimizing your production device.

Testing and Validation

Our embedded test experts can confirm a pixel-perfect match between your concept and implementation.

Altia’s Engineering Services Team includes expert designers, engineers, project managers, testers and user experience practitioners. These people live and breathe embedded GUI development. **They have [production-proven experience](#) for getting sophisticated embedded GUIs to market quickly, efficiently and successfully for [automotive](#), [medical](#) and beyond.**
